

Air-conditioning inspection

Why you might need to have one

Why's it so important?

It's good practice

Maintaining an efficient air-conditioning system is a straightforward but essential procedure. It minimises energy wastage and saves your organisation money by reducing your energy bills.

It's also the law

In January 2011 legislation was introduced requiring organisations that operate a comfort cooling system of 12 kW output or more, to have an energy efficiency inspection on that system – now and thereafter every five years.

At any time, you could find a local authority trading standards officer requesting a report on your air-conditioning system. In the case of a property being sold or leased, that request could even come from a client's solicitor.

The relatively low cost of an inspection from tadea would help you to avoid any unnecessary financial penalties and ensure that your air conditioning system is operating efficiently.

What's in the inspection?

Our qualified air-conditioning inspectors can undertake an assessment, providing you with a tailor-made report making recommendations for improvement. The inspection includes checks to ensure that:

- Air-conditioning system fins are clear
- There is no debris in or around the unit
- It is properly insulated
- Internal filters are clear of dust and grease.

Where possible, operational temperature readings are also taken during the inspection.

Get in condition with tadea

Since tadea was established in 2002, we have built an impressive reputation for the delivery of trusted and impartial sustainable services to many individuals, businesses and other organisations in the public and private sector – as well as private householders.

Working with some of the most forward thinking local authorities and major companies, we have an established track record as a key player in business and consumer engagement leading to effective carbon reduction outcomes.

Our purpose is to provide expert advice, project management and delivery of services in sustainable energy, carbon reduction and tackling climate change and fuel poverty.

Our after-care service can support you to implement the recommendations made in your report and review your progress. It's just one example of how we go the extra mile to help our clients achieve a sustainable future.

Book your inspection by going to www.tadea.com or call us on 0845 602 9569.
